**Subject:** The deer problem, again.

Dear Mary,

While I was struggling with landscape maintenance, a kind gentleman from the other side of the island stopped by to introduce himself and asked if the devastation was caused by the deer. I said it was but there was equal or more contribution from neighbors and the city, all of whom ignored my plea for consideration. They all knew the damage fencing would cause. Nature took its course.

No one cared. Except Mr. Green.

Elizabeth Doyle

PS My back property is even worse. It is no longer possible to continue its maintenance. The patio furniture remains covered under unsightly wraps. I have been unable to use or enjoy the patio since legal and *illegal* fences were constructed despite my protest. The blighted landscape surrounding my house has increased my toil and diminished my property value along with my pride.

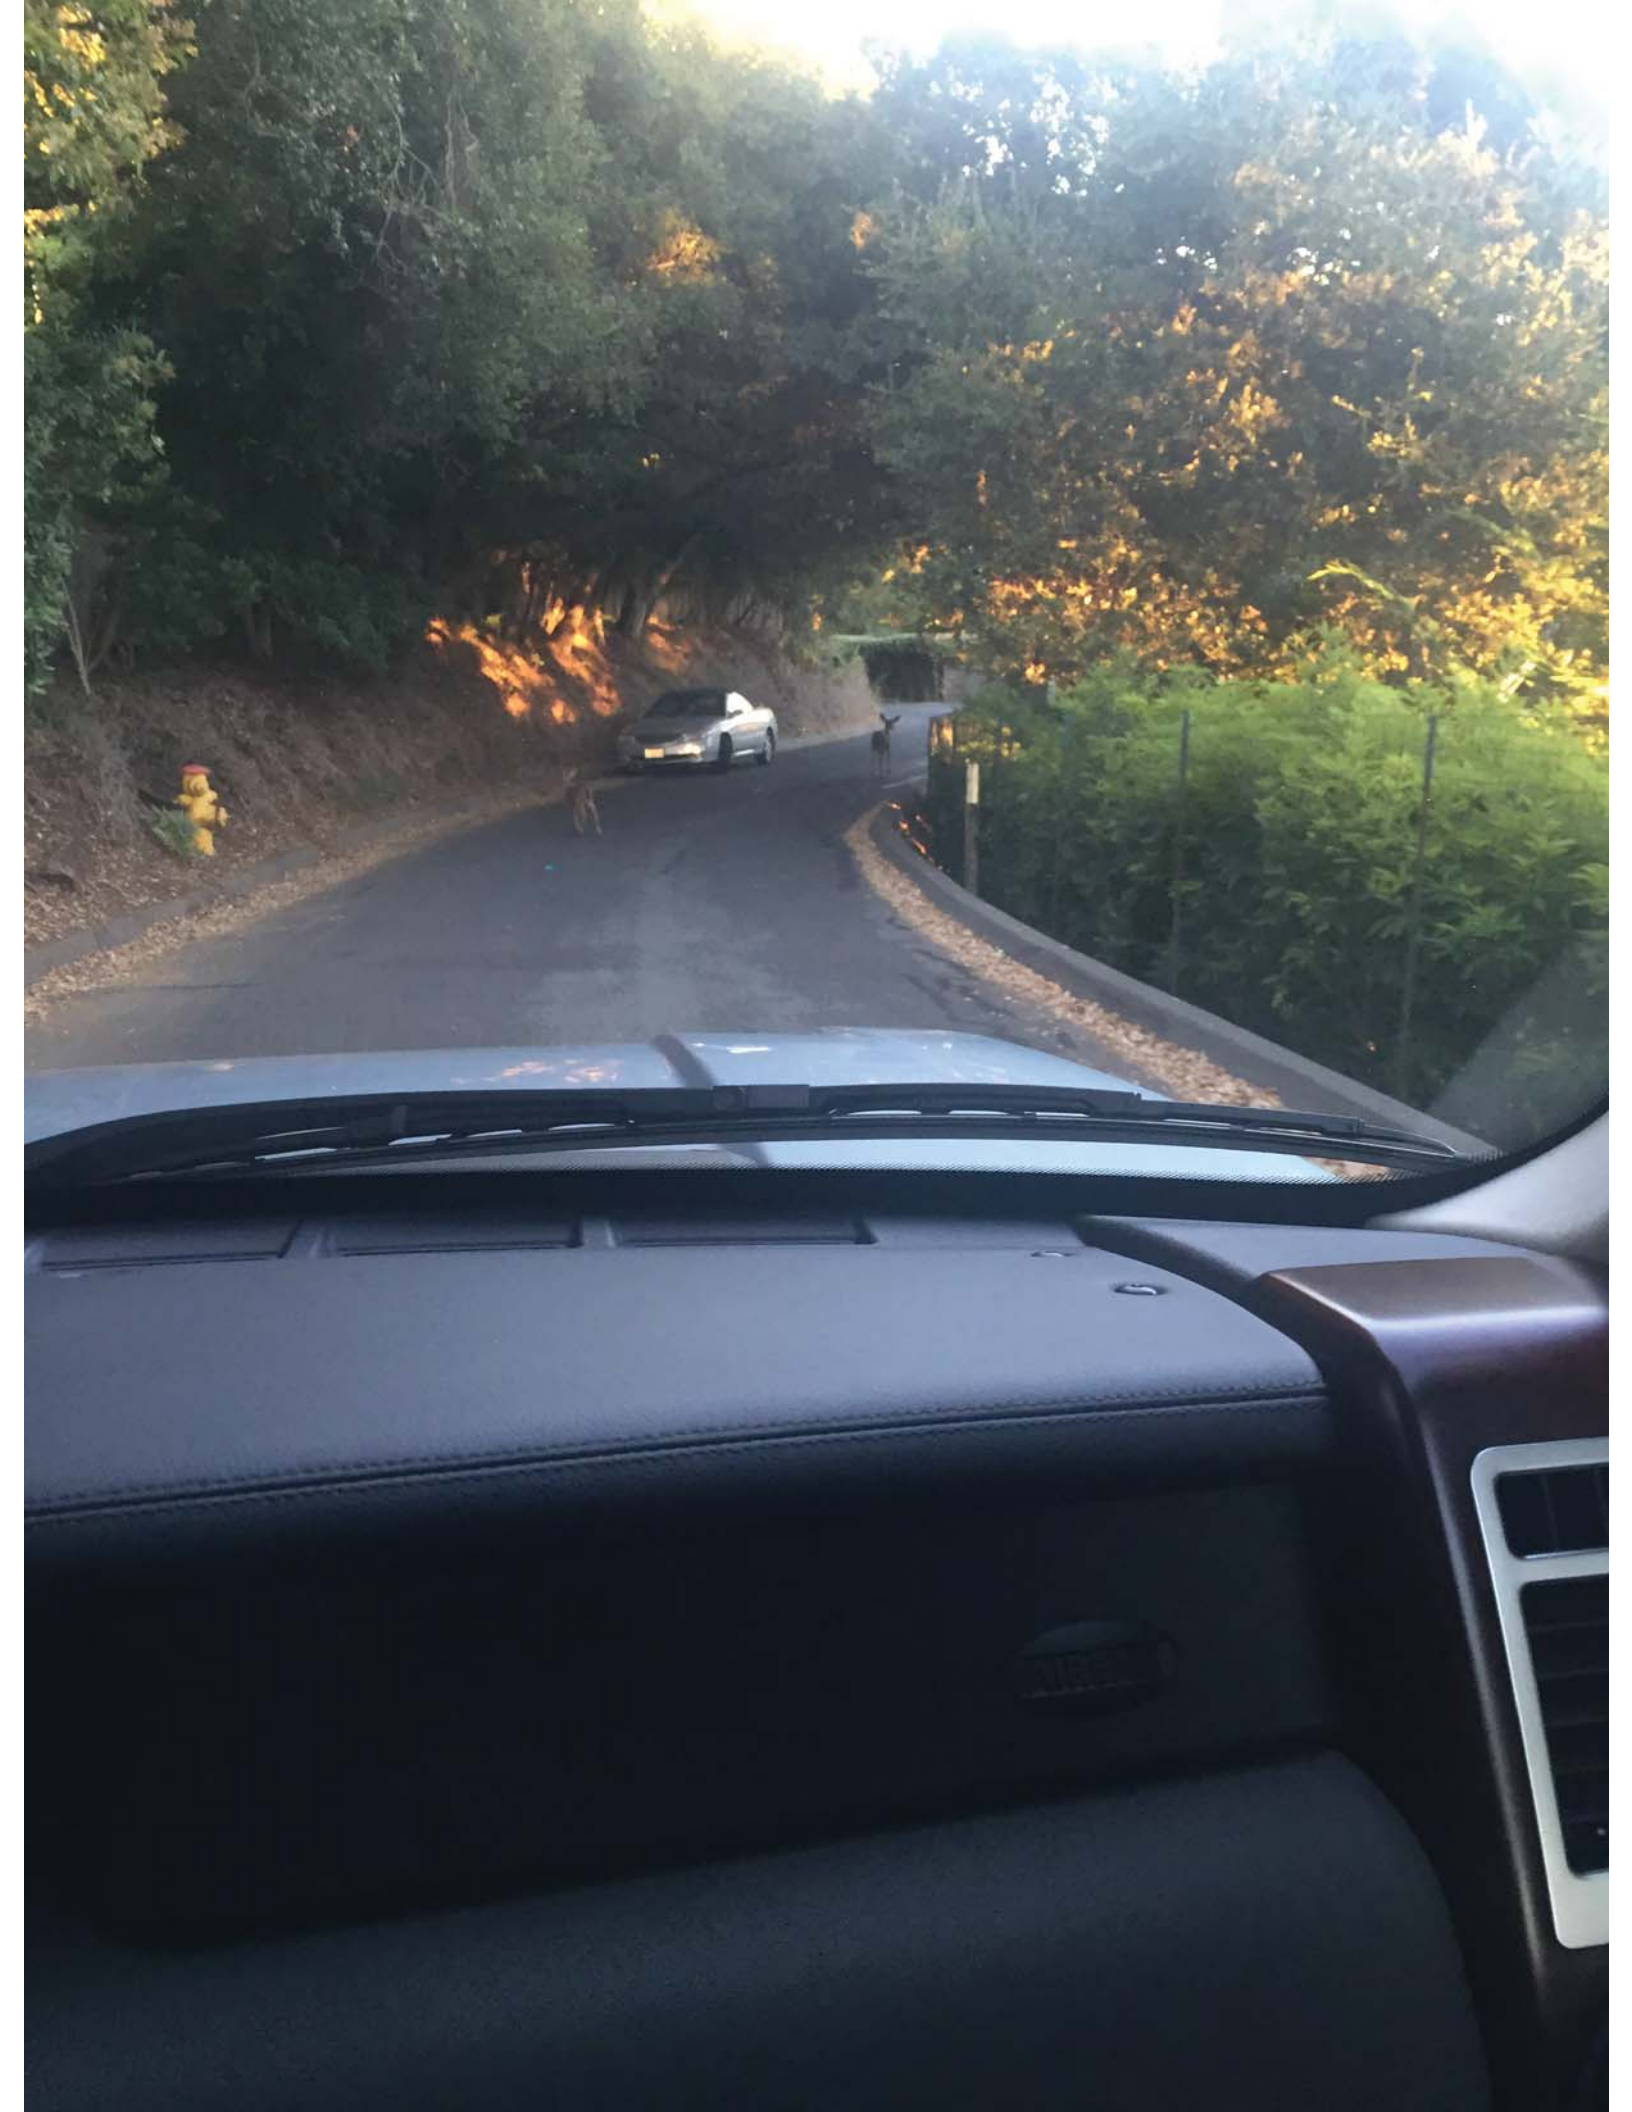

As for the deer, they have made themselves at home. They live here, sleep here overnight, eat everything in sight, snooze between meals, give birth to fawns and leave an unending supply of feces.

At Clair McAuliffe's suggestion, I am sending photos of deer that I took on Eucalyptus and on Oak Place over the past few days. There are a number of fawns, evidence that the herd is reproducing. This is the first photo. On Eucalyptus.
